

## Reflective Metallic Flooring System

- Highly Decorative
- Unlimited Designs
- Affordable

Nothing "WOWs" like a bespoke floor and the finishes created using our Reflective Metallic Pigments are definitely WOW!

## Get the look your client wants

Each Reflective Metallic Floor is unique because there are so many alternatives for you to choose from.

### Options

- **Colours:** There are 20 basic blends to choose from and these can be mixed to create individual colours for a project
- **Resins:** Epoxy, polyurethane or polyaspartic, each resin creates a subtly different pattern.
- **Sealers:** Choose from high gloss, satin or matt finishes. \*see sealer product information

### Easy to use

*The most basic swirl patterns are surprisingly easy to create. The powder is so light it's suspended in the resin. The action of the resin levelling gives an almost 3 dimensional effect.*
