

VENETIAN PLASTERS

fine Italian decorative stuccos

VENETIAN PLASTERS

The Venetian Republic paved the way for chic decorating designs using Venetian plasters.

rialto venetian plasters established their roots in the city of Trieste, the corner of the Adriatic Sea.

Today, **rialto** offers a wide range of attractive and technical solutions to provide answers to the most demanding projects.

rialto venetian plasters, also named “stucco”, or “stucco spatolato” after the application methods using a spatula, is a comprehensive range of finishes that includes from the traditional lime based stucco **rialto epoca spatolato** to the most hi-tech **rialto solution** based on siloxane resins.

Siloxane binders grant a good water repellancy combined to an excellent water vapor permeability.

Needless to say, the user friendly acrylic stuccos available in a high gloss or matte appearance, **rialto evolution** and **rialto veneziano**, with their intense color tones.

rialto evolution

Versatile acrylic stucco for interiors.

Matte, translucent, glazed walls can be obtained using different techniques.

Traditional look and simple execution.

rialto veneziano

Color depth for prestigious interiors.

The highest sheen you can get from an acrylic Venetian plaster without any additional waxing.

rialto epoca spatolato

Natural stucco for natural look.

Comprised of genuine seasoned slaked lime (grassello di calce).

Suitable for both interiors and exteriors. Ideal replica of true ancient lime stucco.

rialto epoca marmo

A mineral and natural “marmorino look”.

Particularly suitable to obtain a rustic look or a smooth resistant surface.

For interior and exterior use.

rialto solution

Using a spatula, this resin based finish can achieve a highly sophisticated look, suitable for interiors as well as exteriors.

Consisting of siloxane binders, vapor permeability properties, and water repellency. A combination that satisfies the needs of contemporary architecture.

rialto and the environment

rialto venetian plasters are all essentially made of water based binders, genuine Carrara marble dust, direct from Tuscany, dolomitic carbonates, and fine talcs. Colorants are all water based and designed to obtain resistant color tones. They do not affect the workability of the putty.

rialto Lab is particularly sensitive to environmental aspects (**rialto** full range of products includes a photocatalytic paint system).

All these finishes have an extremely low VOC content and fulfill the restrictive directives worldwide.

For more details about VOC content and components, **download the MSDS or contact your dealer at www.rialto-colors.com**

For technical details and specifications download them from our website at **www.rialto-colors.com** or contact your local dealer.
