Politura Microcement Range

ELEGANT

ADAPTABLE

VERSATILE

PRACTICAL

DURABLE

Politura is a Polymer Modified Microcement that was created based on years of research and development and combined with decades of experience, having introduced our first Microcement to the UK in 1992.

The technology behind Politura is the most advanced in the market place in terms of durability and ease of application. The triple quartz matrix ensures that Politura has industry leading durability.

ELEGANT

Clean, striking and full of character.

Microcement is the elegant finish suitable for both modern and period projects.

ADAPTABLE

Politura can be used on both horizontal and vertical surfaces.

Bonding to multiple surfaces including screeds, timber and tiles.

VERSATILE

In the hands of an experience craftsman it is possible to achieve a multitude of finishes and designs on both horizontal and vertical surfaces.

The smaller grains of quartz allow the applicator to dictate the finish.

- No Chatter Marks
- Polishable
- Completely smooth finish achievable
- Multiple finishes

PRACTICAL

Politura is a fully powdered system, engineered to be easy to use.

Pigmented to order the system has been created to ensure consistency across each and every project.

DURABLE

Based on a quartz aggregate, Politura is the most durable microcement available today.

UNIVERSAL APPLICATIONS

- Bathrooms
- Kitchens
- Warehouse
- Restaurants
- Art Galleries

- Showrooms
- Bedrooms
- Stores
- Domestic
- External

PERFORMANCE CHARACTERISTICS

Walkable after	3 to 4 hrs
Compressive Strength	46N/mm ²
Tensile Strength	10N/mm ²
Underfloor Heating	Yes

- Easy to apply - 2 to 3 day system
- Same products - multiple finishes
- U V Stable
- System build - 2 to 3mm

NATURO STONE

- Natural Stone look
- Smooth or Textured Finish
- Horizontal and Vertical applications
- Seamless or tile effect
- System Build 5 - 25mm

BASE COAT - Self Leveller

- 3 - 6 mm system build
- Polishable
- Flexible - hybrid polymer modified
- Extremely hardwearing
